

Management Questions Manager

By Anthony Kalampogias

Thank you for downloading my application !

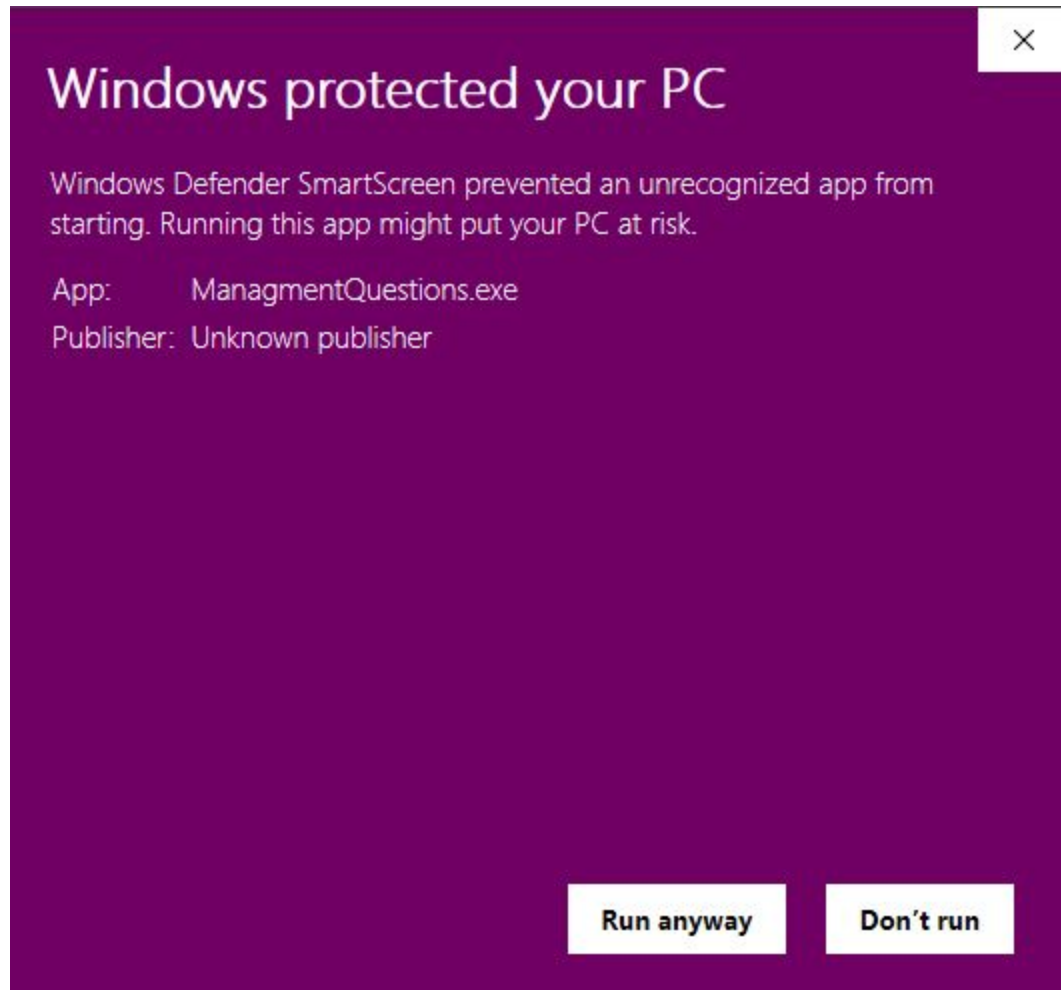

This app will host on its database some questions that the user will provide ,then the user is able to delete them or make an exam sheet with the available questions, more details in the program.

The process is pretty simple:

- Run the ManagmentQuestions.exe (the application)
 - Your computer might warn you that it is a virus

Simply click the **More info** button under the Windows message and
Then click the new button that appeared saying **Run anyway !**

NOTES

1. Please DO NOT make any changes directly on the database for that action might corrupt the entire program, for any actions on the database only use the application!
2. For any problems, suggestions, bugs or anything feel free to contact me @ antonykalampogias@gmail.com
